Because of the low cost of these plants, we can not furnish replacements, nor can we mail or deliver the packets. You will be reminded by post card when and where to pick up your order. Please pick up your order promptly when notified. We do not have storage facilities and will not be responsible for the condition of the plants if they are not picked up on time.

Tree Seedling Descriptions

Species	Growth Rate	Mature Height Width	Description
Colorado Blue Spruce <i>Picea pungens</i>	Slow to Medium	30-60' H 10-20' W	Noted for its hardiness and attractive blue color. Adaptable to various sites, prefers rich, moist, well drained soils in full sun. Also thrives on drier sites.
Norway Spruce <i>Picea abies</i>	Medium to Fast	40-60' H 25-30' W	Medium growing pyramidal tree that becomes very graceful in maturity. Prefers moist, well drained acidic soils; however, it is perhaps the most adaptable common evergreen tree to harsh conditions, it thrives under seasonal drought once established, and takes well to city pollution. One requirement is to not plant in wet soils, where it will die quickly.
White Pine <i>Pinus strobus</i>	Fast	50-80' H 25-35' W	Hardy, fast growing pine native to the eastern U.S. Loosely pyramidal as a young tree, becomes more irregular with age. Prefers well drained or dry sites. Long living tree with long, soft 2-5" needles.
Sugar Maple <i>Acer saccharum</i>	Medium	60-70' H	Hardy shade tree with dark green foliage. Turns shades of red and orange in the fall.
Bur Oak <i>Quercus macrocarpa</i>	Slow	70-80' H	Does well in a variety of soil conditions. Noted for its corky branches. Leaf color is dark green in summer and yellow to yellowish-brown in fall.
Chinese Chestnut <i>Castanea mollissima</i>	Slow to Medium	40-60' H 40-60' W	This is a nut-producing tree, yielding nuts for human and wildlife consumption. Full sun is the ideal condition for this tree, meaning it should get at least six hours of direct, unfiltered sunlight each day. The Chinese chestnut grows in acidic, loamy, moist, sandy, well-drained, and clay soils. It is drought-tolerant. This tree should be planted in pairs or groups to ensure pollination.
Red Osier Dogwood <i>Cornus sericea</i>	Fast	7-9' H 10' W	Dense, fast growing plant that produces white flowers and white berries. Leaves turn to purplish-red fall color. Stems stay red in winter.
Eastern Redbud <i>Cercis canadensis</i>	Fast	20-30' H 25-35' W	Vase shaped tree with purplish pink flowers that bloom in spring. Green foliage turns yellow in fall.
Ohio Wildflower Seed Packet 1 ounce packet will plant approximately 300 square feet	Contains a mixture of the following: Crimson Clover, Golden Alexanders, Culver's Root, Smooth Oxeye, Maximilian Sunflower, Partridge Pea, Lanceleaf Coreopsis, Plains Coreopsis, Illinois Bundleflower, Wild Senna, Purple Coneflower, Wild Bergamot, Greyhead Coneflower, New-England Aster, Black-eyed Susan, Upright Coneflower, Common Evening Primrose, Browneyed Susan, Canada Goldenrod, Gray Goldenrod, Foxglove Beardtongue, Purple Prairie Clover, Western Yarrow, Common Milkweed, Swamp Milkweed
