Because of the low cost of these plants, we cannot furnish replacements, nor can we mail or deliver the packets. You will be reminded by postcard when and where to pick up your order. Please pick up your order promptly when notified. We do not have storage facilities and will not be responsible for the condition of the plants if they are not picked up on time.

Tree Seedling Descriptions

Species	Growth Rate	Mature Height Width	Description
White Cedar <i>Thuja occidentalis</i>	Slow to Medium	30' H 10' W	North American native tree. A popular landscape tree, with a broad pyramidal shape and lush dark green summer color. Full to partial sun and prefers well-drained soil but will tolerate other soil types.
Arborvitae Dark Green <i>Thuja occidentalis</i>	Slow to Medium	30' H 10' W	North American native tree also known as white cedar. A popular landscape tree, with a broad pyramidal shape and lush dark green summer color. Full to partial sun and prefers well-drained soil but will tolerate other soil types.
Norway Spruce <i>Picea abies</i>	Medium to Fast	40-60' H 25-30' W	Medium growing pyramidal tree that becomes very graceful in maturity. Prefers moist, well-drained acidic soils; however, it is perhaps the most adaptable common evergreen tree to harsh conditions, it thrives under seasonal drought once established, and takes well to city pollution. One requirement is to not plant in wet soils, where it will die quickly.
White Pine <i>Pinus strobus</i>	Fast	50-80' H 25-35' W	Hardy, fast growing pine native to the eastern U.S. Loosely pyramidal as a young tree, becomes more irregular with age. Prefers well-drained or dry sites. Long living tree with long, soft 2-5" needles.
White Spruce <i>Picea glauca</i>	Medium	40-60' H 10-20' W	Provides year-round color, grows narrow, straight, and tall. Tolerates most soil conditions and can withstand wind, heat, cold, drought, crowding, and some shade. Prefers full sun. Soil preference: acidic, clay, drought, loamy, moist, sandy, well-drained
Sugar Maple <i>Acer saccharum</i>	Slow to Medium	60-75' H 40-50' W	Hardy shade tree with dark green foliage. As seasons change, leaves turn shades of yellow, orange, and red. Sun preference: full sun, partial sun/shade Soil preference: acidic, alkaline, drought, well-drained
White Oak <i>Quercus alba</i>	Slow to Medium	50-80' H	Provides great fall color, with leaves turning showy shades of red or burgundy. Grows in an oval or rounded shape. The acorns are one of the best sources of food for wildlife. Sun preference: full sun, partial sun/shade Soil preference: acidic, drought, moist, well-drained
American Plum <i>Prunus americana</i>	Medium to Fast	10-20' H 15-25' W	Displays white blooms in early spring, produces 1" reddish-purple plums. Typically planted for ornamental and wildlife value. Sun preference: full sun, partial sun/shade, full shade Soil preference: clay, loamy, moist, well-drained, slightly acidic
Redbud <i>Cercis canadensis</i>	Medium	20-30' H 25-35' W	Blooms in rosy pink flowers in the spring. Leaves emerge a reddish color, turning dark green and then yellow in the fall. Sun preference: full sun, partial sun/shade Soil preference: acidic, alkaline, clay, loamy, moist, rich, sandy, well-drained
